

AIR FUNNEL FOR HVAC INSPECTIONS
With MAS-100 NT® 6022 and MAS-100 Eco®

AIR FUNNEL FOR INDUCTION-FREE AIR SAMPLING

Do you carry out hygiene inspections according to VDI 6022/ SWKI VA104-01 and want to ensure that you measure only the supply air without induction of the room air when measuring the supply air?

Then we have the right accessory for you: Our air funnel for hygiene inspections. The two-component system, consisting of an air funnel adapter and a air funnel foil, can be used with all [MAS-100 NT® 6022](#) and [MAS-100 Eco®](#) air samplers for various air outlets (2 sizes available). Not least because it is easy to clean and can be easily carried in the hygiene inspection case, it is part of every basic equipment for hygiene inspections. Because nothing is easier: The MAS-100 hygiene inspection set.

BENEFITS

- No sampling errors due to external air intake
- UV-stable
- Disinfectable

FACTS ABOUT THE ADAPTER

- Colour: Gray
- Material: Polyamide
- Dimensions: 5 cm high, diameter of 11.5 cm
- Weight: 0.230 kg

FACTS ABOUT THE FOIL

- Colour: Transparent
- Material: HPVC
- Thickness: 0.4 mm
- Size:
 - Small: Truncated cone Ø 425mm, 20 cm Ø (mounted)
