PRODUCTION DISCONTINUATION OF MAS-100 CG EX

SERVICE INFORMATION LETTER 2021_11

Product affected: MAS-100 CG Ex

Change level:

- optional
- recommend by MBV
- mandatory
- for information only

1. REASON

This document describes the end of production of the MAS-100 CG Ex microbial pressurized gas sampler and the implications on future availability, service and support.

2. END OF PRODUCTION OF THE MAS-100 CG EX MICROBIAL PRESSURIZED GAS SAMPLER

Order and delivery: The production of the MAS-100 CG Ex® microbial pressurized gas sampler will be discontinued by the end of 2021. After that date there is no guarantee of supply. There may be a few exceptions of MAS-100 CG Ex units on stock either at MBV or at Merck (operating as MilliporeSigma in the US and Canada). Inquire with your local MAS-100 sales team.

A replacement product to the MAS-100 CG Ex will be announced as soon as available. Like the MAS-100 CG Ex, it will permit to directly sample pressurized gas under pressure with the decompression occurring in a controlled manner after the sampling plate.

Repair Service / Accessories: Repair service and the availability of accessories are guaranteed until end of 2023. Based on the experience of historical demands the repair service and accessory availability is planned for a minimum of further 3 years beyond this date. This and possible further extensions are subject to spare parts availability.

The list of accessories included in this phase-out announcement is provided in Annex 1.

Calibration Service: Airflow calibration of MAS-100 CG Ex will be carried out by MBV in Switzerland and by EMD Millipore in the USA and Merck in China in the future. No end date for such services has been defined or communicated.
