# PRODUCTION DISCONTINUATION OF MAS-100 ECO

## SERVICE INFORMATION LETTER 2025-02-26 V2.0

Product affected: MAS-100 Eco®  
Change level:  mandatory  
 recommended by MBV  
 for information only

### 1. REASON

This document describes the end of production of the MAS-100 Eco Microbial Air Sampler and the implications for future availability, service, and support for MAS-100 Eco customers.

### 2. END OF PRODUCTION OF THE MAS-100 ECO MICROBIAL AIR SAMPLER

Order and delivery: The production of the MAS-100 Eco microbial air sampler will be discontinued by the end of 2027. After that date, there is no guarantee of supply. There are MAS-100 Eco units in stock at MBV and at Merck (operating as MilliporeSigma in the US and Canada). The MAS-100 sales team is always available to assist you with final purchases or alternative products. A replacement product for the MAS-100 Eco will be announced as soon as available.

Repair Service / Accessories: Availability is guaranteed for five years after production discontinuation. Further extensions will be reviewed on a case-by-case basis and depend on the availability of parts.

Calibration Service: The airflow calibration of the MAS-100 Eco will continue to be carried out by MBV in Switzerland. Currently, there is no planned end date for these services. Please note that calibration depends on the technical condition of the instrument and the availability of spare parts in case of repair situations.
